On this magnificent journey, Karen will facilitate sessions at our lodging which will delve into our lessons from Dolphin. Meanwhile we will be out in the ocean for five days swimming with dolphins in the wild. Dolphins can open new creation and dimensions to a great degree. Water is essential to life, but so is breath. Dolphin has a rhythm to it's breathing and to it's swimming. When you align yourself with dolphin through breathing, you can have dolphin take you to all the places and times that existed before the great seas covered most of the world.

Sessions will also address the lesson of adaptation. As the Hopi elders have shared, "the river is rising some, and we must be able to keep our heads above the currents."

Our time together will enable you to come home totally refreshed, energized and with a new view on your life's mission.

Karen has been teaching meditation, psychic development and shamanic courses since 1980. She has traveled with the Wildquest Team and has chosen this date for it's supportive energies from the planets. We hope you'll set your intention to join us!
