WORKSHOP: During the weekend you will learn how to “assess” the land in order to make corrective changes to the energy fields. The 3 major grids of negative stress include:

1. Geopathic grid of earth energies such as imbalanced mineral content in soil, underground running water, rock strata, heavy metals in water supply, and radon.
2. Hartmann grid from all the man-made energies of electrical surging, radar, sonar, microwaves, and cell phone towers.
3. Personal grid unique to the owners of each property.

By the weekend’s end, you will have gained hands-on experience of diagnostics, flagging the 3 grids, and installing the copper rods to correct along negative lines. Once a safe zone of Tensor energy has been created, you will retest the property and discover for yourself that the building and the land are indeed “stress free.”

TRAINING INCLUDES:

- Working with Pendulum for yourself and your community
- Working with a Compass
- Dowsing with L-Rods
- Diagnosing and Installing L-Rods along meridians

BACKGROUND: Earth Acupuncture is well established in Europe and Scandinavia, and is known as the ancient science of *Geomancy* in Asia. In our Western culture, creating safe, sacred space benefits the treatment of a wide range of health challenges both energetic and physical. Economic and other personal issues are also corrected. Historically, Dowsing has been a tool for thousands of years to meet the needs of people all over the world, primarily for finding water and precious metals. Surprisingly, the military, the police, the mining industry, and even the Catholic Church have used dowsing as an everyday tool to help in “finding and correcting” things and people.

Karen Rice King: Karen has a double major in World Religion and Counseling Psychology from Western College for Women, where she was the assistant to the Chaplain. In 1977 she was teaching Psychic Development and Meditation at the Boulder Free School in Colorado. She met Slim Spurling after a serious auto accident in 1990 in which she had sustained a critical head injury and full body whiplash among other injuries. About 8 months after the incident, Slim installed rods at Karen’s home, and the miracles began. She resumed the ability to read with comprehension; she fully regained her speech; painful symptoms were alleviated; and her healing recovery accelerated. Karen exclaimed to Slim: “I have to learn what you are doing — please!”

Within a couple of years of working together on properties, Slim suggested that Karen coin the term “Earth Acupuncture” and start teaching it. Their work together birthed Karen’s nationally known training program in Dowsing and Earth Acupuncture. Slim facilitated Karen’s recognition as a Master Dowser with the International Dowsters Society because of her abilities to find “off-grid” negative lines on properties. Since then Karen has taught this work throughout the western U.S., training apprentices and practitioners.

Karen has been a teacher for more than 30 years including Shamanism in her resume, having completed the Teacher Training Program with Sandra Ingerman in 2004. Karen has focused her “curing” and research on ADD, ADHD, and behavioral issues and chemical sensitivities in children. She also continues to research why Colorado leads the nation in adult cases of MS, breast cancer, and prostate cancer.
